ABOUT US

To deliver customized high-quality products with state-of-the-art technology for enhancing and empowering our customers' needs. To be the global leader in efficiently solving our customers' requirements in the Defence and Aerospace industry. Johnnette Technologies has been delivering advanced aerospace systems to Indian Armed Forces, Paramilitary, and our Commercial clients. Our primary goal is to enhance our solutions continuously and ensure that they align with all the dynamic needs of the industry. Our expertise in Unmanned Systems Technology has helped to develop cutting edge Unmanned Aerial Vehicles (UAVs) that are capable of carrying out tasks that are impossible otherwise by humans. With a military-qualified expert team, Johnnette has provided various solutions to the military and commercial sectors. We have delivered more than 700 drones to the Indian Defence.

Johnnette Technologies was awarded the Best Technology Product Startup of the Year at SEDI Awards 2015, Industrial Excellence Award in 2017, Top 200 MSME Award in 2019, Industrial Product Finder Award in 2020, Awarded Product Excellence Award of the Year at IPF Excellence Awards 2021 for our product NPNT U2.0 and Awarded Best Product Innovation for Johnnette JM-1 Loitering Munition at Society of Indian Defence Manufacturers.

UNMANNED TECHNOLOGIES

JF-2 TACTICAL

JOHNNETTE JF-2 TACTICAL UAV

BATTLE-PROVEN

Description

Johnnette JF-2 features a wingspan of 2.3 meters, granting it an avian-like appearance and facilitating effective radar camouflage due to its construction from EPP and composite materials. Beyond a distance of 100 meters, the aircraft's aural signature becomes almost imperceptible, rendering it an excellent choice for stealth operations both during the day and at night. Additionally, its crash-resistant avionics bay makes it an optimal solution for land forces. The JF-2 is adept at conducting Intelligence, Surveillance, and Reconnaissance (ISR) activities, equipped with a high-definition camera and a thermal imaging camera, making it suitable for operations in both daylight and night time conditions. This system can be effectively deployed using hand launch mechanism.

Specifications

1. Wingspan: 230cm/2.3m
2. Aircraft Weight: 5.5 Kgs
3. Payloads – Day & Night (Thermal) Gimbaled Cameras
4. Endurance: 75 min
5. Operating Temperature: -10°C to +50°C
6. Range: 15 Km
7. Propulsion: Electric
8. Max Tested Launch Altitude: 18000ft
9. Cruise Speed: 45 Km/hr
10. Max Speed: 60 Km/hr
11. Material: EPP+ Composite
12. Software: Johnnette GCS Closed Source Encrypted
13. GCS: MIL STD laptop integrated with our software

JM-2 COMBAT

JOHNNETTE JM-2 LOITERING MUNITION

Description

Johnnette JM-2 loitering munition is a fire and forget system designed for autonomous missions, enabling forces to deploy it by inputting specific latitude and longitude coordinates. It is equipped with a 1 kg warhead and can be directed by the operator to strike the designated target as programmed into the mission planning software, thereby enhancing the operational effectiveness of the Armed Forces. The JM-2 is configured for autonomous missions and is employed in both anti-personnel and anti-material operations. This platform is ECCM compliant.

Specifications

1. Wingspan: 1.4m
2. Aircraft Weight: ≤ 5 Kg
3. Payloads: Day Camera and Warhead 1 kg AP
4. Endurance: 35 min
5. Operating Temperature: -20°C to +55°C
6. Range: 30 Km
7. Propulsion: Electric
8. Max Launch Altitude: 5000m
9. Cruise Speed: 80 Km/hr
10. Max Speed: 120 Km/hr
11. Material: EPP+ Composite
12. Software: Johnnette GCS Closed Source Encrypted Softwarwe
13. GCS: MIL STD laptop integrated with our software
14. Accuracy - 10m CEP
15. Launch - Catapult Launch/ Pneumatic Launch
16. ECCM - Anti Jamming & Anti Spoofing / FHSS
17. All Weather Capability

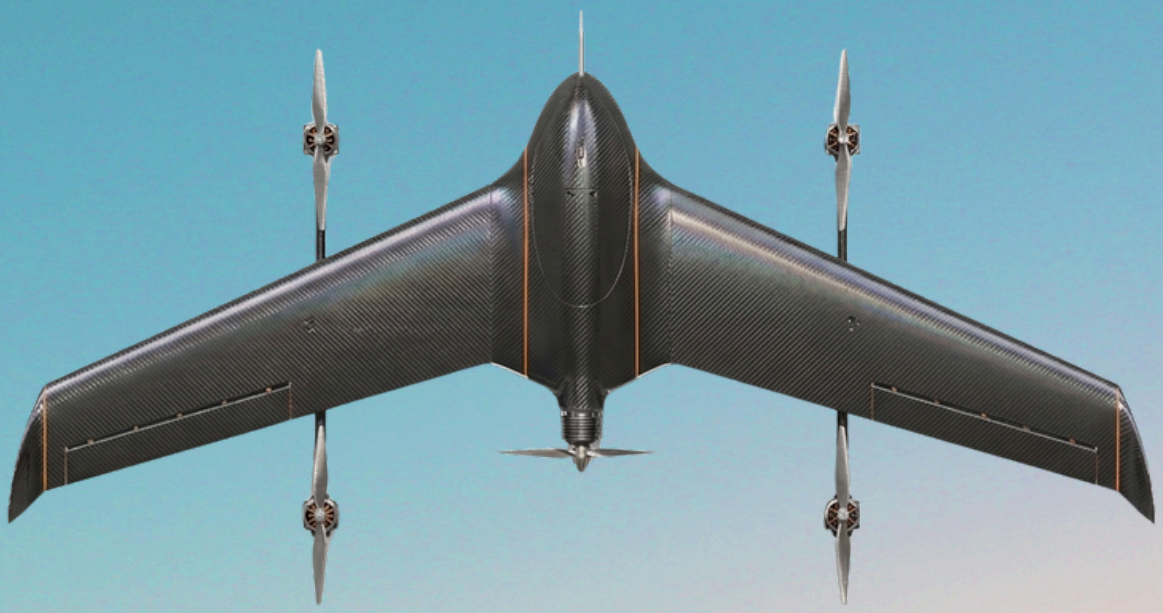
JOHNNETTE JM-3

LOITERING MUNITION



JOHNNETTE JM-3 LOITERING MUNITION (AJAS)

Description

The Johnnette JM-3 is a state-of-the-art VTOL fixed-wing loitering munition designed for medium-range anti-personnel and anti-material operations. With a range of 50 km and an endurance of 60 minutes, it features a high-explosive warhead filled with approximately 1000 shrapnel with a 15-meter kill radius. The JM-3 is equipped with advanced day and night engagement capabilities, utilising a low light camera and an IR camera. Its multi-mode guidance system ensures effective operation in contested environments, while robust safety features enhance mission reliability. This platform is ECCM compliant.

Specifications

1. Endurance: 60 Min
2. Wingspan: 2.5 m
3. Range: 50 km
4. Aircraft Weight: 13 Kg
5. Warhead Weight: 5 Kg
6. Payload: Static low light Camera
7. Cruise Speed: 90-110 km/h
8. Max Speed: 150-170 km/h
9. Propulsion: Electric
10. Launch / Recovery: VTOL
11. ECCM: Anti-Jamming and Anti-Spoofing Capabilities

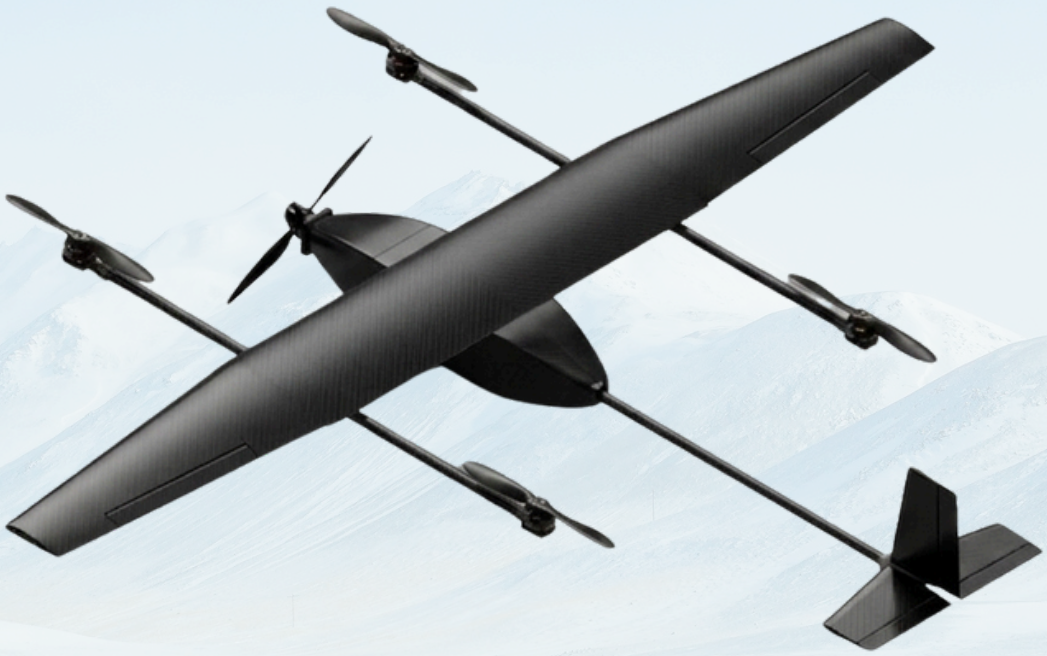
JOHNNETTE JF-3 VTOL

SURVEILLANCE



JOHNNETTE JF-3 VTOL (ISTAR)

Description

JF-3 VTOL is an advanced tactical fixed-wing UAV designed for Intelligence, Surveillance, Target Acquisition, and Reconnaissance (ISTAR) missions. With Vertical Take-Off and Landing capability, it enables operations from confined areas without requiring a runway. The platform offers long endurance, low acoustic signature, and high operational flexibility for battlefield, border, and maritime surveillance. Equipped with advanced EO/IR sensor payloads, JF-3 VTOL ensures reliable real-time monitoring and situational awareness in diverse operational environments.

Specifications - Surveillance Version

1. Wingspan: 3 m
2. Aircraft Weight: 17 kg
3. Payload Capacity: 2 kg
4. Endurance: 150 min
5. Operational Range: 50 km
6. Cruise Speed: 60 km/h.
7. Maximum Speed: 110 km/h
8. Propulsion System: electric motor with Lithium-polymer battery pack.
9. Launch Method: VTOL
10. Recovery Method: VTOL recovery
11. ECCM: Anti-Jamming and Anti-Spoofing Capabilities/ FHSS
12. Payload: 30x Continous zoom in Day, 16x Continous zoom in thermal
13. All Weather Capability

JOHNNETTE JF-4

Description

Johnnette JF-4 will be a Medium Altitude Long Endurance strategic Unmanned Combat Aerial Vehicle capable of conducting operations that are performed with fighter jets. Its unique design and speed will increase its survivability in higher threat environments and provide the user with an expanded quick-response armed reconnaissance capability. Wide-area surveillance, time-sensitive strike missions over land or sea, and a host of other challenging military missions can be performed with this highly advanced, next-generation Remotely Piloted Aircraft.

Tentative Specifications

1. Wingspan: 14 m
2. Aircraft Weight: 1800 Kg
3. Payloads: EO/IR, Radar, Ammo
4. Endurance: 16 Hrs
5. Range: 350 Km
6. Propulsion: Turbo-Prop
7. Service Ceiling: 30,000 Ft
8. Communication: RF / SATCOM
9. Navigation: GPS + NAVIC
10. Radar: AESA

INTRODUCING ITAKS

JOHNNETTE ITAKS

Description

The Johnnette ITAKS (Integrated Targeting and Kill System) is an advanced solution that seamlessly integrates two specialised UAVs to deliver a decisive tactical edge in combat scenarios. The system combines the capabilities of the Johnnette JF-3, a Tactical ISR UAV, and the Johnnette JM-2, a Loitering munition, to enable swift and synchronised operations. The JF-3 is responsible for real-time reconnaissance and target acquisition, using high-resolution sensors to identify and relay target data to the control centre. This information is then utilised by the JM-2, which executes precise strike missions. Together, these UAVs form a tightly coordinated kill chain, significantly reducing response time and enhancing mission effectiveness. ITAKS is designed for salvo attacks on the enemy that completely decimate their positions.

System Composition: Dual-UAV Integration

UAV Platform	Role in ITAKS
Johnnette JF-3 Tactical ISR UAV	(i) Performs aerial reconnaissance (ii) Identifies & marks targets (iii) Transmits real-time coordinates to control station
Johnnette JM-2 Loitering Munition	(i) Executes precision strikes on designated targets (ii) Operates swiftly based on ISR inputs (iii)Optimized for effectiveness and impact

ITAKS – Key Highlights

(i) Dual-UAV Integration for seamless recon and strike
(ii) Modular Design enabling multi-platform deployment
(iii) Autonomous Operations reduce operator effort
(iv) High-Precision Strikes with minimal response time
(v) Real-time Targeting
(vi) Salvo Attack

(Will be ready by May 2026)

APPRECIATION FOR COMPLETE OPERATIONAL SUPPORT TO JOHNETTE TECHNOLOGIES FOR MILITARY DRONE OPERATIONS IN RAJOURI SECTOR

1. I place on record my formal appreciation to Wg Cdr Gautam Banerjee and his dedicated team of Johnette Technologies professionals.

2. The Team of Johnette Technologies also played a pivotal operational support during '**Op SINDOOR**'

Grateful thanks for being with us during these challenging times, where only the best of friends and worst of enemies only visit us. You have been a tremendous support! Proud of you.

Best regards,

Yours Sincerely,

Dear Wing Commander,

1. I am writing to convey my sincere appreciation for exceptional contribution made by you and your team in swift provisioning of LMs and providing realistic operational and technical training of the user units which has positively contributed towards enhancing operational efficiency of the formation.

2. The dedication demonstrated by each member of your team reflects not only your professional capabilities but also profound sense of nationalism in each member of your team. I recognize your team's ability to adapt to the ever evolving operational necessities of the user units and to provide innovative and real-time solutions within overall framework of operational capability enhancement of the formation.

Wg Cdr Gautam Banerjee (Retd)
and Team Johnnettte Technologies

APPRECIATION FOR EXCEPTIONAL CLOSE OPERATIONAL SUPPORT DURING "OPERATION SINDOOR"

1. On behalf of Col GS (SD & WE) (Procurement & Projects), I extend my sincere appreciation for the exceptional support provided by Johnnette Technologies during "**Operation Sindoor**" in the regions of Poonch, Krishna Ghati, Bhimber Gali, Narian and Naushera.

2. Your commitment to excellence and willingness to travel to our operational locations to support our efforts were truly commendable. The expertise and high-quality resources for Surveillance and Loiter Munitions provided by your team were instrumental in enhancing the operational preparedness of our forces. The tactical training on drone operations delivered by your team proved valuable, significantly strengthening our operational capabilities and adding substantial punch to our efforts. Your nationalism sense of keeping your LM's and surveillance drones ready for strike during " **Operation Sindoor**" shows the professional competence and the Josh is praiseworthy.
