ABOUT US

To deliver customized high-quality products with state-of-the-art technology for enhancing and empowering our customers' needs. To be the global leader in efficiently solving our customers' requirements in the Defence and Aerospace industry. Johnnette Technologies has been delivering advanced aerospace systems to Indian Armed Forces, Paramilitary, and our Commercial clients. Our primary goal is to enhance our solutions continuously and ensure that they align with all the dynamic needs of the industry. Our expertise in Unmanned Systems Technology has helped to develop cutting edge Unmanned Aerial Vehicles (UAVs) that are capable of carrying out tasks that are impossible otherwise by humans. With a military-qualified expert team, Johnnette has provided various solutions to the military and commercial sectors. We have delivered more than 700 drones to the Indian Defence.

Johnnette Technologies was awarded the Best Technology Product Startup of the Year at SEDI Awards 2015, Industrial Excellence Award in 2017, Top 200 MSME Award in 2019, Industrial Product Finder Award in 2020, Awarded Product Excellence Award of the Year at IPF Excellence Awards 2021 for our product NPNT U2.0 and Awarded Best Product Innovation for Johnnette JM-1 Loitering Munition at Society of Indian Defence Manufacturers.

UNMANNED TECHNOLOGIES

JF-2 TACTICAL

JOHNNETTE JF-2 TACTICAL UAV

BATTLE-PROVEN

Description

Johnnette JF-2 features a wingspan of 2.3 meters, granting it an avian-like appearance and facilitating effective radar camouflage due to its construction from EPP and composite materials. Beyond a distance of 100 meters, the aircraft's aural signature becomes almost imperceptible, rendering it an excellent choice for stealth operations both during the day and at night. Additionally, its crash-resistant avionics bay makes it an optimal solution for land forces. The JF-2 is adept at conducting Intelligence, Surveillance, and Reconnaissance (ISR) activities, equipped with a high-definition camera and a thermal imaging camera, making it suitable for operations in both daylight and night time conditions. This system can be effectively deployed using hand launch mechanism.

Specifications

1. Wingspan: 230cm/2.3m
2. Aircraft Weight: 5.5 Kgs
3. Payloads – Day & Night (Thermal) Gimbaled Cameras
4. Endurance: 75 min
5. Operating Temperature: -10°C to +50°C
6. Range: 15 Km
7. Propulsion: Electric
8. Max Tested Launch Altitude: 18000ft
9. Cruise Speed: 45 Km/hr
10. Max Speed: 60 Km/hr
11. Material: EPP+ Composite
12. Software: Johnnette GCS Closed Source Encrypted
13. GCS: MIL STD laptop integrated with our software
14. Electronic Resilience: Anti-Jamming & Anti-Spoofing (AJAS) capability
15. Navigation: INS-based Navigation

JOHNNETTE JM-1X LOITERING MUNITION

Description

Johnnette JM-1X is a next-generation loitering munition designed for precision strike missions, combining an advanced aerial platform with reliable communication and anti-jamming capabilities. With an operational range of 15 km, it supports mission execution through an integrated Ground Control Station (GCS). Its compact design and flexible launch options enable deployment across different operational environments. Built around the common JM-series platform, the JM-1X integrates flight, navigation and communication systems for reliable mission control in electronically contested environments.

Specifications

1. Wingspan: 1.8 m
2. Fuselage Length: 1.3 m
3. Aircraft Weight: ≤ 6 kg (including payload)
4. Range: 15 km
5. Endurance: 40 min with Payload
6. Operating Temperature: −20°C to +50°C
7. Maximum Launch Altitude: 2,500 m above MSL
8. Maximum Operating Altitude: Up to 1,200 m AGL
9. Maximum Speed: 130 km/h
10. Cruise Speed: 70 km/h
11. Propulsion: Rear-mounted single electric motor
12. Camera Payload: Day Camera 1280 × 720; Thermal Camera 640 × 480
13. Munition Payload: Minimum 1 kg
14. Communication Frequency: 2200–2500 MHz
15. Software: GCS Closed-Source Encrypted Software
16. Anti-Jamming / ECCM: 4-element CRPA antenna & FHSS
17. Strike Accuracy: ≤ 10 m radius

JM-2 COMBAT

LOITERING MUNITION

JOHNNETTE JM-2 LOITERING MUNITION

Description

Johnnette JM-2 loitering munition is a fire and forget system designed for autonomous missions, enabling forces to deploy it by inputting specific latitude and longitude coordinates. It is equipped with a 1 kg warhead and can be directed by the operator to strike the designated target as programmed into the mission planning software, thereby enhancing the operational effectiveness of the Armed Forces. The JM-2 is configured for autonomous missions and is employed in both anti-personnel and anti-material operations. This platform is ECCM compliant.

Specifications

1. Wingspan: 1.8 m
2. Fuselage Length: 1.3 m
3. Maximum Weight / Aircraft Weight: ≤ 7 kg
4. Range: 35 km (one-way)
5. Endurance: 35 min
6. Operating Temperature: −20°C to +55°C
7. Maximum Launch Altitude: 2,500 m above MSL
8. Maximum Operating Altitude: Up to 1,000 m AGL
9. Maximum Speed: 150 km/h
10. Cruise Speed: 80 km/h
11. Propulsion: Electric
12. Camera Payload: EO/IR
13. Munition Payload: 1 kg (LM-60/1000 AP)
14. Communication Frequency: 2200–2500 MHz
15. Software: GCS Closed-Source Encrypted Software
16. Anti-Jamming / ECCM: 4-element CRPA antenna & FHSS
17. Strike Accuracy: 10 m CEP

JOHNNETTE JM-2X LOITERING MUNITION

Description

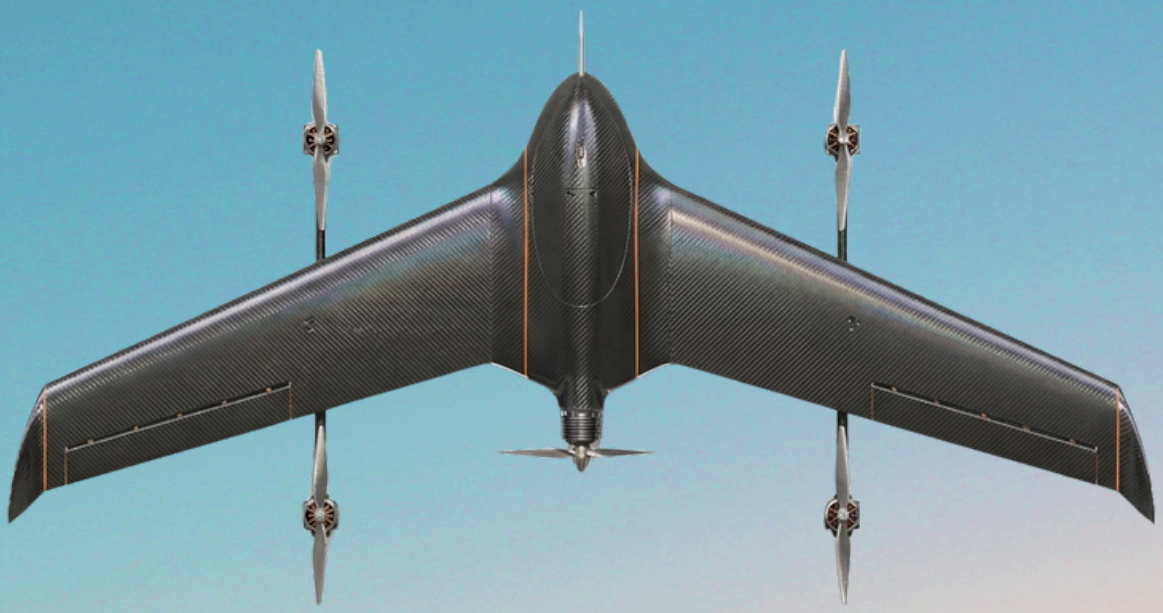
Johnnette JM-2X is an advanced loitering munition designed for precision strike missions, combining a proven aerial platform with an extended operational range of 70 km. Integrated with a Ground Control Station (GCS), it supports mission control and fire-and-forget operation. Built around the common JM-series platform, the JM-2X features a communication system designed to support long-range operations, delivering enhanced operational reach and mission flexibility.

Specifications

1. Wingspan: 1.8 m
2. Fuselage Length: 1.3 m
3. Aircraft Weight: ≤ 7 kg
4. Range: 70 km (one-way)
5. Endurance: 35 min
6. Operating Temperature: -20°C to +55°C
7. Maximum Launch Altitude: 2,500 m above MSL
8. Maximum Operating Altitude: Up to 1,000 m AGL
9. Maximum Speed: 150 km/h
10. Cruise Speed: 80 km/h
11. Propulsion: Electric
12. Camera Payload: EO/IR
13. Munition Payload: 1 kg (LM-60/1000 AP)
14. Communication Frequency: 2200–2500 MHz
15. Software: GCS Closed-Source Encrypted Software
16. Anti-Jamming / ECCM: 4-element CRPA antenna & FHSS
17. Strike Accuracy: 10 m CEP

JOHNNETTE JM-3

LOITERING MUNITION



JOHNNETTE JM-3 LOITERING MUNITION (AJAS)

Description

The Johnnette JM-3 is a state-of-the-art VTOL fixed-wing loitering munition designed for medium-range anti-personnel and anti-material operations, including AI-guided engagement of moving armoured and personnel targets. With a range of 50 km and an endurance of 60 minutes, it features a high-explosive warhead filled with approximately 1000 shrapnel with a 15-meter kill radius. The JM-3 is equipped with advanced day and night engagement capabilities, utilising a low-light camera and an IR camera. Its multi-mode guidance system ensures effective operation in contested environments, while robust safety features enhance mission reliability. This platform is ECCM compliant.

Specifications

1. Endurance: 60 Min
2. Wingspan: 2.5 m
3. Range: 50 km
4. Aircraft Weight: 13 Kg
5. Warhead Weight: 5 Kg
6. Payload: Static low-light camera
7. Cruise Speed: 90-110 km/h
8. Max Speed: 150-170 km/h
9. Propulsion: Electric
10. Launch / Recovery: VTOL
11. ECCM: Anti-Jamming and Anti-Spoofing Capabilities
12. All-weather capability with waterproofing

JOHNNETTE JM-4 COMBAT

JET POWERED LOITERING MUNITION

JOHNNETTE JM-4 COMBAT (JET POWERED LM)

Description

The Johnnette JM-4 is a high-speed, jet-powered UAV-missile hybrid designed for rapid-response tactical strikes and precision engagements against high-value targets. Combining high-speed strike capability, extended range, and targeted firepower, the JM-4 bridges the gap between traditional unmanned aerial systems and cruise missiles. Powered by a jet propulsion system, the JM-4 reaches speeds up to Mach 0.5, minimizing the target's reaction time and enhancing survivability in contested environments.

Specifications

1. Endurance: 50 Min
2. Wingspan: 4 m
3. Range: 100 km
4. Aircraft Weight: 40 Kg
5. Warhead Weight: 5 Kg
6. Payload: 5 Kg Warhead
7. Cruise Speed: 618 km/h
8. Max Speed: 750 km/h
9. Propulsion: Turbo Jet Engine
10. Launch: Catapult Launch
11. ECCM: Anti-Jamming and Anti-Spoofing Capabilities
12. Temperature Range: -20°C to +50°C

JOHNNETTE JF-3 VTOL

SURVEILLANCE

JOHNNETTE JF-3 VTOL (ISTAR)

Description

JF-3 VTOL is an advanced tactical fixed-wing UAV designed for Intelligence, Surveillance, Target Acquisition, and Reconnaissance (ISTAR) missions. With Vertical Take-Off and Landing capability, it enables operations from confined areas without requiring a runway. The platform offers long endurance, low acoustic signature, and high operational flexibility for battlefield, border, and maritime surveillance. Equipped with advanced MICRO-600 EO/IR sensor payloads, JF-3 VTOL ensures reliable real-time monitoring and situational awareness in diverse operational environments.

Specifications - Surveillance Version

1. Wingspan: 3 m
2. Aircraft Weight: 17 kg
3. Payload Capacity: 2 kg (MICRO-600 EO/IR)
4. Endurance: 150 min
5. Operational Range: 50 km
6. Cruise Speed: 60 km/h
7. Maximum Speed: 110 km/h
8. Propulsion System: electric motor with Lithium-polymer battery pack.
9. Launch Method: VTOL
10. Recovery Method: VTOL recovery
11. ECCM: Anti-Jamming and Anti-Spoofing Capabilities/ FHSS
12. Payload: 30x continous zoom in Day, 16x continuous zoom in thermal
13. All-weather capability with waterproofing

JOHNNETTE JF-4

Description

Johnnette JF-4 will be a Medium Altitude Long Endurance strategic Unmanned Combat Aerial Vehicle capable of conducting operations that are performed with fighter jets. Its unique design and speed will increase its survivability in higher threat environments and provide the user with an expanded quick-response armed reconnaissance capability. Wide-area surveillance, time-sensitive strike missions over land or sea, and a host of other challenging military missions can be performed with this highly advanced, next-generation Remotely Piloted Aircraft.

Tentative Specifications

1. Wingspan: 14 m
2. Aircraft Weight: 1800 Kg
3. Payloads: EO/IR, Radar, Ammo
4. Endurance: 16 Hrs
5. Range: 350 Km
6. Propulsion: Turbo-Prop
7. Service Ceiling: 30,000 Ft
8. Communication: RF / SATCOM
9. Navigation: GPS + NAVIC
10. Radar: AESA

JOHNNETTE JB1

UNMANNED SURFACE VESSEL

JOHNNETTE JB1 (UNMANNED SURFACE VESSEL)

Description

Johnnette JB1 is an Unmanned Surface Vessel (USV) designed for remotely controlled as well as semi-autonomous surveillance missions, enabling users to deploy it in chosen designated areas. This state-of-the-art vessel is designed for precise way-point navigation in autonomous mode. The compact design of the vessel makes it almost imperceptible, rendering it an excellent choice for stealth operations both during the day and at night. The JB1 is adept at conducting Intelligence, Surveillance, and Reconnaissance (ISR) activities, equipped with a high definition EO/IR camera, making it suitable for operations in both daylight and night time conditions. The unmanned platform provides an avenue for reduction of risk to human life, reduction in demand on capital assets and significantly enhance surveillance capability in terms of range and duration.

Specifications

1. Length Overall: 2 m
2. Beam width: 1 m
3. Draught: 30 cm
4. Total Wt Including Max Payload: ≤ 250 Kg
5. Payload Carrying capacity : 50 Kg
6. Operating Temperature: -10°C to +55°C
7. Propulsion: Electric (Battery Powered)
8. Mode: Remotely controlled and semi-autonomous
9. Range: 45 km
10. Endurance: 04 hours
11. Speed: 08 kmph (Cruise mode); 14 kmph (Maximum Speed)
12. Payloads: (a) Day Camera – EO 1080p 60fps with 10X Optical Zoom
    (b) Night Camera - IR 640x480P with 4X Digital Zoom
    (c) SATCOM with Live Video Stream
13. Hull Material: Sandwich Composite
14. Software: Johnnette GCS Closed Source Encrypted
15. GCS: MIL STD laptop integrated with our software
16. Communication: SATCOM

SURVEILLANCE & RECONNAISSANCE

ATTACK & STRIKE MISSION (KAMIKAZE)

TRANSPORT & LOGISTICS

90% MADE IN INDIA

DEPLOYMENT OPTIONS FOR JB1

JB1 is a modular, remotely operated and autonomous maritime platform designed for surveillance, security, logistics and mission-support operations. Its modular architecture enables rapid integration of mission-specific payloads according to operational requirements

Surveillance & Reconnaissance

- Persistent maritime and coastal surveillance
- Day/night situational awareness
- Vessel and activity detection & monitoring
- Harbour, port and critical-infrastructure monitoring
- Autonomous patrol and reconnaissance
- Real-time video and telemetry transmission

Attack & Strike Mission (Kamikaze)

- Modular mission-specific warhead integration
- Configurable payload capacity based on operational requirements
- Designed for engagement of designated maritime targets
- Safety and arming mechanisms integrated according to applicable defence standards
- Compatible with the platform's mission-control and safety architecture

Transport & Logistics

- Autonomous transportation of mission supplies
- Delivery of equipment and essential stores
- Support for remote outposts and maritime operations
- Ship-to-shore and shore-to-shore logistics
- Optional modular cargo compartment

PAYLOADS THAT CAN BE INTEGRATED ON JOHNNETTE JB1

The USV supports a modular payload architecture, enabling integration of mission-specific payload systems for surveillance, reconnaissance, logistics, strike and attack operations. Payloads can be configured according to operational requirements, providing enhanced situational awareness, autonomous mission execution and flexible mission support.

Some of the payloads that can be integrated onto the JB1 platform are :-

- **EO/IR Camera:** Day/night imaging, surveillance and target observation.
- **LRF – Laser Range Finder:** Long-range distance measurement and enhanced situational awareness.
- **Logistics Cargo Module:** Configurable compartment for transportation of mission equipment and essential supplies.
- **Warhead/Mission Effector:** Modular interface for integration of authorised mission-specific explosives.

INTRODUCING ITAKS

JOHNNETTE ITAKS

Description

The Johnnette ITAKS (Integrated Targeting and Kill System) is an advanced solution that seamlessly integrates two specialised UAVs to deliver a decisive tactical edge in combat scenarios. The system combines the capabilities of the Johnnette JF-3, a Tactical ISR UAV, and the Johnnette JM-2, a Loitering munition, to enable swift and synchronised operations. The JF-3 is responsible for real-time reconnaissance and target acquisition, using high-resolution sensors to identify and relay target data to the control centre. This information is then utilised by the JM-2, which executes precise strike missions. Together, these UAVs form a tightly coordinated kill chain, significantly reducing response time and enhancing mission effectiveness. ITAKS is designed for salvo attacks on the enemy that completely decimate their positions.

System Composition: Dual-UAV Integration

UAV Platform	Role in ITAKS
Johnnette JF-3 Tactical ISR UAV	(i) Performs aerial reconnaissance (ii) Identifies & marks targets (iii) Transmits real-time coordinates to control station
Johnnette JM-2 Loitering Munition	(i) Executes precision strikes on designated targets (ii) Operates swiftly based on ISR inputs (iii)Optimized for effectiveness and impact

ITAKS – Key Highlights

(i) Dual-UAV Integration for seamless recon and strike
(ii) Modular Design enabling multi-platform deployment
(iii) Autonomous Operations reduce operator effort
(iv) High-Precision Strikes with minimal response time
(v) Real-time Targeting
(vi) Salvo Attack

(Will be ready by May 2026)

APPRECIATION FOR COMPLETE OPERATIONAL SUPPORT TO JOHNETTE TECHNOLOGIES FOR MILITARY DRONE OPERATIONS IN RAJOURI SECTOR

1. I place on record my formal appreciation to Wg Cdr Gautam Banerjee and his dedicated team of Johnette Technologies professionals.

2. The Team of Johnette Technologies also played a pivotal operational support during '**Op SINDOOR**'

Grateful thanks for being with us during these challenging times, where only the best of friends and worst of enemies only visit us. You have been a tremendous support! Proud of you.

Best regards,

Yours Sincerely,

Noida (UP -201301)

Dear Wing Commander,

1. I am writing to convey my sincere appreciation for exceptional contribution made by you and your team in swift provisioning of LMs and providing realistic operational and technical training of the user units which has positively contributed towards enhancing operational efficiency of the formation.

2. The dedication demonstrated by each member of your team reflects not only your professional capabilities but also profound sense of nationalism in each member of your team. I recognize your team's ability to adapt to the ever evolving operational necessities of the user units and to provide innovative and real-time solutions within overall framework of operational capability enhancement of the formation.

22 May 2025

Wg Cdr Gautam Banerjee (Retd)
and Team Johnnettte Technologies

APPRECIATION FOR EXCEPTIONAL CLOSE OPERATIONAL SUPPORT DURING "OPERATION SINDOOR"

1. On behalf of Col GS (SD & WE) (Procurement & Projects), I extend my sincere appreciation for the exceptional support provided by Johnnette Technologies during "**Operation Sindoor**" in the regions of Poonch, Krishna Ghati, Bhimber Gali, Narian and Naushera.

2. Your commitment to excellence and willingness to travel to our operational locations to support our efforts were truly commendable. The expertise and high-quality resources for Surveillance and Loiter Munitions provided by your team were instrumental in enhancing the operational preparedness of our forces. The tactical training on drone operations delivered by your team proved valuable, significantly strengthening our operational capabilities and adding substantial punch to our efforts. Your nationalism sense of keeping your LM's and surveillance drones ready for strike during " **Operation Sindoor**" shows the professional competence and the Josh is praiseworthy.
